

Where To Find Information on Accounting Software for Small Businesses?

One place to find information on accounting software for small businesses is the Review section at CNET.com. If you perform a search for accounting software in the Review section of CNET.com, you will get a list of the accounting software reviewed by CNET.com within the past 12-18 months. For instance, you can find a review from May 2004 of three accounting software programs for small businesses, including MYOB Plus 2004, Intuit QuickBooks Pro 2004, and Simply Accounting Pro 2004.

AllBusiness.com offers a list a brief description of accounting software for small businesses, with links to the software companies.

You can get information on accounting software for your business at the software section of the Product Guides section of PC Magazine Web site which offers reviews, testing, expert advice, and prices.

Another place to find information on accounting software for small businesses is BizRate.com, an Internet software comparison shopping company. BizRate.com offers price comparisons, consumer reviews, product features, and store ratings of the products it compares. You can search for small business software, where the search results are categorized by price range, brand, type, and product.
